SKILLS

Programming	JavaScript, TypeScript
Frameworks	React.js, Next.js, Node.js, Nest.js
Others	MongoDB, PostgreSQL, MicroORM, TypeORM, REST, GraphQL, Redux, Chart.js, Tailwind, Git, AWS, Chrome Extensions (Chrome API), Auth0, PayloadCMS, English (B2)

SUMMARY

I am a motivated Full-Stack Developer with solid experience in both front-end and back-end development. Skilled in JavaScript, TypeScript, React, and Node.js. As a self-taught developer, I am a dedicated and hardworking individual with a strong passion for personal and professional growth in the field of information technologies. I'm always eager to expand my expertise, adapt to new technologies, and deliver practical solutions that add value. With strong problem-solving skills and a collaborative mindset, I confidently handle different parts of the development process and contribute effectively to team projects.

EDUCATION

Front-end React JS Web Development Course Apiko Academy	2021 - 2022
Full-Stack JS Course LinkUp	2022 - 2023
Bachelor's Degree in Software Engineering West Ukrainian National University	2020 - 2024

EXPERIENCE

Full-Stack Developer Apiko Apiko is a digital transformation consultancy & software development company	12.2023 - 02.2026
---	-------------------

Project under Apiko Software: Huddex

Duration: Dec 2023 - Mar 2024

A mobile app for 2 types of users that will allow customers to quickly ship their packages with couriers who can be anyone, and if you are that courier it's a great opportunity to earn additional money simply by taking your flight and a small package with you). <http://huddex.com>

Scope of work:

- Designed and developed an admin panel to manage platform data, delivering shipments, and system settings;
- Implemented backend services with GraphQL to support flexible queries and efficient data exchange;
- Integrated third-party services such as notification sending services (Email, SMS, Slack API), identity verification system;
- Participated in code reviews, debugging, and performance optimization to ensure stability and scalability of the system.

Tools and technologies:

TypeScript, React, Nest.js, GraphQL, PostgreSQL, MicroORM, SendGrid, IDWise.

Project under Apiko Software: Lanai

Duration: Apr 2024 - Aug 2025

Lanai is an enterprise SaaS company that provides an AI-native platform for monitoring, securing, and optimizing AI usage within organizations. It offers real-time visibility into all employee interactions with AI tools, including unapproved ones, by analyzing prompt-level data. Founded by tech veterans from Google and VMware, Lanai helps companies reduce compliance risks, prevent data leaks, and accelerate AI adoption by identifying high-value use cases and improving tool efficiency. <https://www.withlanai.com>

Scope of work:

- Developed an admin panel to manage platform data, configure policies, and monitor employee AI usage;
- Implemented a Chrome extension to track and analyze generative AI activity across multiple web platforms;
- Built backend services for securely storing, processing, and analyzing prompt data;
- Integrated mechanisms for detecting AI requests across different providers, ensuring compatibility with both existing and emerging tools;
- Collaborated with cross-functional teams to refine product features, improve system scalability, and enhance data security.

Tools and technologies:

TypeScript, Next.js, Chart.js, Nest.js, CockroachDB, PostgreSQL, TypeORM, ChromeAPI, Auth0, Okta SDK, Microsoft Graph Client, PingOne API

Project under Apiko Software: Andy's Bet Club: Premier League Predictor Game

Duration: Aug 2025 - Sep 2025 and March 2026 - April 2026

Contributed to the development and enhancement of the Andy's Bet Club Predictor — a football prediction platform focused on Premier League standings. The game allows users to submit full league table predictions, compete on accuracy leaderboards, and vie for cash prizes. The platform combines real-time sports data, user engagement mechanics, and predictive scoring logic to deliver a competitive and interactive experience for football fans. <https://andysbetclub.co.uk/predictor>

Scope of work:

- Developed core functionality for the Premier League table prediction game, including ranking logic;
- Implemented scoring and leaderboard systems to rank users based on prediction accuracy;
- Integrated data retrieval from football data APIs to dynamically populate fixtures, teams, and league results;
- Worked on performance optimizations to handle high user traffic during peak submission periods;

Tools and technologies:

TypeScript, React, Andt, Nest.js, PostgreSQL, REST, GraphQL, Prisma ORM, Redis

Project under Apiko Software: Hotaly

Duration: Sep 2025 - Feb 2026

Hotaly is a unified venue listing and event planning platform that aggregates venues, activities, and hospitality services under multiple branded sites targeting different audiences (e.g., corporate events, leisure, family adventures, and tourism) to increase venue visibility and bookings across key market segments.

<https://hotaly.ai/platforms>

Scope of work:

- Developed multiple platform front-end sites using a single codebase;
- Built and maintained the admin dashboard for managing venue listings, content, and metadata;
- Integrated Payload CMS as the central content management system to allow editors and administrators to manage platform content, settings, and multi-brand configurations from a unified interface;
- Ensured a scalable architecture supporting multiple distinct front-end experiences from a single repository;

Tools and technologies:

C#, PostgreSQL, TypeScript, Next.js, PayloadCMS, Radix UI, MongoDB, AWS SDK, Vite
